

Beth Awarded The Clevamama Soother Tree 4/5

Packaging was good and instructions were clear and precise and easy to follow. Website could be improved with better images and made easier to navigate. The size is great as it is compact and easy to store. The steriliser is designed for soothers with a ring so that they can be hung up. This product is easily cleaned, just wash in soapy water. A product that is well made and robust, so you know it will last. Reasonable value for money. The steriliser was very fast, depending on the power of the microwave, it can work in just one minute. It was quite hot when removing it from the microwave and the handle on the top is quite small so care needs to be taken when moving it while hot (the base contains very hot water). The base has a non slip grip which means that you can take the top off easily with one hand. It is certainly very quick and portable. It does what it says on the tin, but if you are using a larger steriliser for other items it could be surplus to requirements. It would be good for a holiday or to leave with grandparents. This item is compact, quick and easy to use, however it gets quite hot and the handle for carrying it is quite small. *Beth Leslie – Baby Evie 6 Months*
