

"Fantastic solution to all your dummy needs"

This product is just wonderful.

Rather than having to find room in a normal steriliser, not only does this solve that issue but it also keeps the dummies contained so that you know where they all are.

A quick 50ml of water and 90 seconds in the microwave and they are ready to be used.

Convenient vents allow you to drain the water out of the soother tree without even opening it - meaning the dummies stay sterile for as long as possible. There is even a small handle on top to prevent you from scalding yourself when you take it out of the microwave.

The only downside is that they **MUST** have rings, to hook onto the arms. So dummies such as MAM which do not, do not fit in this. Luckily we're an Avent family, so this suits us just fine.
