

*Product Tested By* **Chloe Robinson – Baby Poppy 5 Months**  
**Chloe Awarded The Clevamama Soother Tree 4/5**

Good idea and I liked the packaging however not something I would buy as I normally sterilise soothers in the bottle steriliser. Really colourful and a nice box. Very easy to follow simple instructions. The size of this soother tree is very compact, fits nicely on top of my microwave. Both my children use dummy's and I was able to sterilise all of them at once and keep them stored in there until they were needed. I just popped it in the dishwasher every week I haven't needed to descale it yet, so easy to keep clean. The soother sterilizer is very robust and certainly does the job well. This only takes 3 minutes to sterilize which is quicker than my bottle steriliser and I think this is very quick and acceptable. I really liked the size of this soother tree and the packaging. I wouldn't buy one myself at £8.99 as I already have a bottle steriliser and this can clean all items for baby. I will continue to use this as it is small, compact and easy to use and quick to sterilize soothers. Might be a nice idea as a special gift for a new mum. I think the free soothers are good idea if you are already using that specific type of soother, as most babies already like a certain dummy brand. I would also suggest the company place a warning sign on the unit as it is so hot once the cycle has finished people may need reminding it's very very hot. Overall Simple to use and a nice compact size. *Chloe Robinson – Baby Poppy 5 Months*
